West Coast. 12 Nov. 1890

On Wed. 12 Nov. A. Bell & I
 left for Strahan. The Bellinger
 SS was to leave at 3 PM. I was
 delayed changing photo slides
 & got down with my luggage abt
 1/2 past 3, then had to call to
 office to sign some papers & when
 I got back found steamer
 waiting for me. Sailed abt 3:30
 dull day with light breeze &
 threatening weather. 86 passengers
 57 cabin & 29 steerage - wondered
 where they would all be stowed -
 eery as women & child-filled deck
 cabin where we had taken berths.
 However soon shook down - Bellinger
 most comfortable pass. boat of her
 size 200 tons that I have seen -
 Roomy cabins & saloon. & fine
 house on deck for 6 - We went
 down channel abt 8:30 passed
 big Actaion close inside. passage
 not a mile wide, then past
 Black Reef & to Whales head
 where we began to get ocean
 swell to confusion of many passengers
 abt 10 PM

When I turned in - Talk with
Fisher abt Lachmans charts &
August pass R. Provis. Niles,
Tom & Fisher, Marsh, Brownell
& Scott & Shells &c &c.

At bed time thick & rainy.
Thurs. 13th Nov

Awoke early & turned out before

5. Had rounded Str Cape
& were approaching South Head
of Port Davey. View of coast
before sunrise with red
glow in East overland was
splendid. Mild & romantic
mountains of all sorts of
grotesque shapes - a huge
tumbled mass of abrupt
& bare mountains tier after
tier inland. Every variety
of hue & colour in morning
glow. Huge rounded
masses of rock, jutting out
into the sea - Great dark
olive brown mountain
Mt Saddleback at North
Head - large white patches
of quartz on hills - Outlying
rocks at South head of Port Davey

As we coasted north weather
began to grow thicker &
eventually raining but hardly
any wind - only big ocean
swell from Str.

Rocky Point few rocks
with reefs jutting out very
far into sea. Coast hills
get low along Mainwaring
with ends of ranges in
the distance. Then Point
Hibbs low peninsula of
dark rock with some little
islands. N. of it a huge
pyramidal rock very
remarkable & visible long
distance. Shore makes
a dark goldenish brown
col^d line not much
elevated but perfectly level
in height all the way
like a terrace. Slope
rock a little more than
half or nearly two thirds
of way to Cape Sorell. No
high land visible in fog but
Frenchman is visible from
this part. Surprised to find

Cape Sorell was not sandy
but metamorphic rock.
Got glimpses of Heemskerk
& Leehan - & peaks of
West Coast range from
Lyndal to Sorell a
fine row of Sentinel
giants bluish in distance.

Cape Sorell yellowish
metamorphic rock much
of it densely cov^d with bright
green scrub & stunted
bush. Off cape is
the Whale Rock a black
clump of rock submerged
by every roller. As we
rounded cape the mountains
changed their places in
most perplexing way.
Water quite smooth on bar
which is some hundreds
of yard outside entrance.
Heavy lead & going slow
10 ft on bar. Then into
entrance. Bar is land
of metam. rock cov^d with
bright green bush about
200 yds from right shore.

On other side wide opening
sea breaking all across.
Only entrance betⁿ island

town lighted by electricity
for 5 yrs - a great
place for country houses.
for Sydney people
abt 2000 ft high -
fresh delightful air

Friday 19 Oct. Woke at 6.
looked out - raining.
after bkfst at 9 Haddins
Coach (or wagonette) came
& we set off from Moss Vale.
Fine road. passed
Horsby Park an old
settlers house. & below it
an ancient mill now
dwelling house - with
long row of willows - a

little further. Osbornes
new house. brick & shingle
roofed with slate, rather
like pictures of American
country house. (The owners
party at Kangaroo Valley)
Country after this poor
something like hell.
Cressy & Lake River - only
ugly gum bush. barren
land. after passing
some marshes & a little
down stream, came to the
bridge. Here Fitzroy falls
went to lower bridge over
top of falls - but all the
valley & gorge one huge
sea of mist. The old Saw
water slipping over but no
further. The old Ranger
(a Bradford man) came
up & we followed him round
to look out places, railed off
top of cliffs with strong iron
rails - (noticed from trees
apart damagng trees &c.)
at first look out place got

from Moss Vale
11 miles

1894

a glimpse to bottom of gorge
some 1000 ft down - very
fine - stream at bottom of
steep sides cov^d with light
green foliage - apparently
mostly NW water - but guide
didn't tell us what trees
~~Here near top of fall must be~~
~~view of first & chief fall~~
view of first & chief fall
abt 200 ft - a very pretty
fall water falling in
great veils or spurts -
no great volume but
fine - in effect of veils
& scattered in spray at
bottom - Went to various
lookouts railed off &
had fine glimpses into
the huge gorge & of various
minor falls - Twin fall
&c - Water rolling up gully
& swirling up in great
masses - but persistently
hanging in head of gorge
until fresh masses came
up so that altho we
saw long way down the

great gorge & had views
of most of falls whenever
not a full view - At
the last look out (not railed
in) we stood for a long time
to get view of all falls,
we saw the immense
amphitheatre of rock into
which river falls, & the 2nd or
lower fall, cataracts above
& just the white shadows
of the great 1st fall at
extreme apex of gorge -
It is finer in effect than
falls in Blue Hills & in
spite of fog was very
impressive - After abt
an hour & a quarter got
back to trap - & got off
soon after 12 - Same
uninteresting Gumbash for
some miles abt 4, then
began to descend pass
in Barrengarry Range
down the most extraordinary twisting
road I ever travelled - doubling
back on itself & winding &
twisting in every direction

1894

at our point above Craig
Crest with us
The bush very beautiful
down this mountain road
great variety of foliage -
dark green shiny leaved
trees particularly - looked
down into Kangaroo Valley
long valley sheltered by
ranges - with wide pasture
land of deep green -
brightest green forming
beautiful dairy country -
Cut up into small farms
little pastures high up
on ledges of the hills -
Winding down saw for
first time cabbage trees
(palms / 2 varieties) 1 long
with leaf at top the other
short with fan like
leaves - also handsome
feathery plant called
Burra-wong fern in great
quantity - Winding down
into valley reached
Condons about 2 - 19 miles
from Moss Vale - Had lunch
Someone else had all but
devoured fowl & prepared

for us - as we were 1 hour
late - The little farmers
dairy men doing well -
from 20 cows up to 100
(Osbornes) The level
pastures in front of
Condons very rich looking
with fine cattle in
scores - After leaving
this secluded valley a
home of peace & rich
pasture - After leaving
Condons abt 3 proceeded
along valley which extends
for miles Saw little farms
in all sorts of inaccessible
places all looking green
& flourishing - Began to
ascend Cambewarra ranges
by winding pass - got
out & walked (to relieve
horses) up steep winding
road - bush on hill side
often both sides most
luxuriant - Guns at top
of hills but lower along
road every shade of foliage

1894

Splendid large petioles in
profusion - dark green shiny
leaved orange like trees - also
laurel leaved - slender stemmed
trees with heads like ash -
ferns, ferns, here & there a
tall cabbage palm standing
high above - here & there the
tulle tree leaves like mallows
Huron Road - Meredith Valley -
Scottsdale Road - N.Z. Coast Rd
to but with beautiful features
of its own. Near head of pass
looked down on two rich
looking dairy farms on flat
near top surrounded by bush.
Old fashioned farm houses.
Began to descend by winding
road - same high banks
of foliage - These two passes
almost finish bush scenery
I have ever been thru. Saw
tall tree say 150 ft high
with large masses of brown
fern up trunk - also
near top great yellow clumps
of rockily - On descent

Sydney

looked over large plain
Cambewarra - dairy farms
Many dead trees standing
